

Our products are easy to use

All electronic features are controlled using prominent keys, which makes our protectors very easy to use. The built-in memory function remembers your last setting when you switch the electronics on.

- Whichever product you choose you are guaranteed a first-class hearing protector that gives a perfect seal and fit.
- CutOff and Supreme give you more than an effective hearing protector. You can also easily connect a hunting radio, dog tracker or other external audio source.
- The level-dependent operation protects your hearing while letting you communicate freely with those around you while still wearing your hearing protector.

Rain and noise have one thing in common

If you go out in the pouring rain without a coat you will get wet through in a matter of minutes. If you then put your umbrella up it will already be too late, you will stay wet for the rest of the day!

It's exactly the same with sound and noise. After just a few minutes without a hearing protector in a noisy environment the damage is already done. Even if you wear a hearing protector for the rest of the day your hearing has already been exposed to more than the ear can take. A few minutes' carelessness is almost as harmful as a whole day in a noisy environment. And damaged hearing can never be repaired.

To guarantee you full protection you must wear your hearing protector

100% of the time you are in a noisy environment.

Accessories

Hygiene kits

To keep your hearing protector working at its best you should replace the hygiene kit at least twice a year (in daily use). The kits contain cushions, noise attenuation foam and inserts.

– multifunction hearing protectors

Protect your hearing

with effective and comfortable hearing protectors

Hearing is one of our most important and most sensitive senses. Anyone who exposes their hearing to loud sounds and noise unfortunately runs a high risk of suffering unnecessary and frustrating hearing damage.

But this can be avoided. Nowadays there is a wide selection of safe and effective hearing protectors that can protect your hearing from permanent damage. It's just a matter of choosing the right one.

The ideal hearing protector should be unobtrusive. It should be so comfortable that you can wear it all the time, and it should work in any situation. Excellent comfort, quality and reliability are key characteristics of all our products. This is true whether you choose a protector with basic features, or a high-tech protector with advanced electronics.

All our products are developed and manufactured in Sweden. And the fact that they are good value for money makes our hearing protectors even more attractive. Welcome to Sordin.

Passive hearing protectors

A passive hearing protector is sound reduction/deadening device that protects you from loud sounds and noise. Our passive hearing protectors offer the highest levels of comfort and noise attenuation. EXC has been developed for use in most noise situations, while HPE is suitable for environments where noise levels are extremely high.

EXC

Suitable for most noise situations. Reliable and comfortable fit.

- Wide headband with soft padding for good comfort.
- Adjustable headband pressure for individual comfort.
- Moulded inserts create more space for your ears.

Headband Art.no 20010

HPE

Extremely comfortable with excellent noise attenuation.

- Wide headband with soft padding for reliable and comfortable fit.
- Adjustable headband pressure for individual comfort.
- Soft, flexible cushions give excellent comfort and good noise attenuation.

Headband Art.no 22010

Sordin CutOff

The CutOff function acts as an effective protective filter. It limits harmful noise but lets important information such as speech and warning shouts get through. To prevent harmful noise levels the speaker output is limited to 82 dB.

CutOff Basic

Built-in reproduction of ambient sound protects your hearing without isolating you. Simple technology that provides the most important base features.

- Lets through speech and other harmless sound, while protecting at the same time from harmful noise from rifles, pistols, etc.
- Sound reproduction in stereo with 1:1 amplification (does not amplify ambient sound).
- Adjustable headband pressure for individual comfort.
- Wide, padded headband for good comfort.

Headband Art.no 25000

CutOff Pro

Developed using the latest technology. Provides natural sound reproduction in stereo with extremely long battery life. With built-in ambient sound reproduction and amplification.

- Amplifies speech and other harmless sound while protecting from harmful noise at the same time.
- 1000 hours battery life and automatic shut-off.
- AUX input for connecting external audio sources, such as a hunting radio or dog tracker. Lead with 3.5 mm mono jack plug included.
- Adjustable headband pressure for individual comfort.
- Wide, padded headband for good comfort.

Headband Art.no 35000

Protect your hearing and listen to the shooting instructor at the same time. With the CutOff feature you avoid harmful noise yet can still communicate freely with those around you.

Effective noise attenuation and amplification at the same time – a perfectly feasible combination with Sordin Supreme

Supreme exploits the latest technology to deliver very high sound quality, with reproduction of ambient sound and good directional location. This means that faint sounds such as distant dog barks, approaching animals and warning signals are amplified, while harmful sounds such as rifle shots and background noise are filtered out efficiently. This is a combination that significantly improves your odds of a successful hunt.

Excellent comfort and reliability
Supreme hearing protectors are not just technically advanced. They are so

comfortable that you can wear them all day without a problem. They also fold up, take up little space in your pack, making them easy to take with you.

Supreme is designed to withstand harsh environments. The central lead exit reduces the risk of lead wear and eliminates loops that could snag on bushes or branches. The electronic design ensures low current consumption and high reliability. Automatic shut-off to save batteries is an added plus. All the electronic features are controlled using a keypad. To prevent harmful noise levels within the cups

the speaker output is limited to 82 dB.

Sordin Supreme comes in various specifications. You choose the level of noise attenuation or electronic features you want. With an AUX input you can easily connect external audio sources, such as a hunting radios, dog tracker or mobile phone. That way you can also use your communication equipment without removing your hearing protector!

With Supreme you are sure to be one step ahead of your hunting partners.

Supreme Basic

Built-in reproduction of ambient sound protects your hearing without isolating you. Simple technology that provides the most important base features. Both earmuffs are shaped to suit both right-handed and left-handed shooters.

- Two separate, well-shielded microphones for optimum stereo effect and location of sound direction.
- Maximum 1:1 sound reproduction, does not amplify ambient sound.
- Around 150 hours battery life with two standard AAA batteries.
- Also available with AUX input.

(with AUX input and lead with 3.5 mm mono jack plug)

Supreme Pro

Our top model. Provides optimum protection with high amplification, AUX input and watertight battery compartment. Both earmuffs are shaped to suit both right-handed and left-handed shots.

- Two separate, well-shielded microphones for optimum stereo effect and location of sound direction.
- High amplification and natural sound reproduction without "chopping".
- Around 600 hours battery life with two standard AAA batteries.
- AUX input for connecting external audio sources, such as a hunting radios or dog tracker. Lead with 3.5 mm mono jack plug included.

Headband Art.no 75302

Supreme Pro+

A hearing protector for those who need higher noise attenuation. The Pro+ has larger earmuffs without a bevelled bottom edge. The larger volume provides added protection against loud noise.

- Two separate, well-shielded microphones for optimum stereo effect and location of sound direction.
- High amplification and natural sound reproduction without "chopping".
- Around 600 hours battery life with two standard AAA batteries.
- AUX input for connecting external audio sources, such as a hunting radios or dog tracker. Lead with 3.5 mm mono jack plug included.
